Check out our exclusive Student Training Programmes designed to hone our Yong Leaders to make a difference!

Our Student Services

We have certified course training modules from the National Institute of Design (NID), India, tailor-made for students to learn the best and in-demand skills in the Industry.

• DCP (Design, Code, Prototype): Solid Works Modelling Software – Computer Aided Design (CAD) Tools, Basic C, C++, Java, Embedded C, 3D Printer applications and prototyping. We have the following three suits of courses to offer:

• Offer 1: Design software (Any One) + coding language (Any One) + Prototype execution using 3D Printer (Plus Theory).

• Offer 2: Design Software (any one)+ Prototype execution using 3D Printer(Plus Theory)

• Offer 3: Design (UI, Photoshop and other tools) + Coding (Web-page or Mobile App Page)
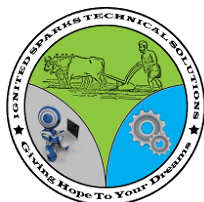

Creating Innovation

About ISTS

With an aim to revolutionize the art of Industrial Engineering, we are a team of skilled engineers constantly working on serving the Industry through Research and Development. Our mission is to bridge the road between Ideas and Design through Engineering and Consulting. We consistently work with our Clients for next generation ideas and impart expert training to make those ideas come to life. With a team of expert trained support engineers, we provide a vast array of services ranging from Front End Consulting to Planning and Strategy development. All of our workforce is committed to Developing, Integrating and Managing Technology solutions.

IGNITED SPARKS TECHNICAL SOLUTIONS

Giving Hope to Your Dreams!

"Service, in short, is not what you do, but who you are. It is a way of living that you need to bring to everything you do, if you are to bring it to your customer interactions" ~ Betsy Sanders

We convert ideas into Reality!

Empowering Students

Our courses are designed so to enhance the exposure of the Students in Design Thinking – The most 'In-Demand' Talent in the Industry. We also have collaborations with several International Student Design Competitions to give Students the platform the test and compete amongst the best. The basic idea is to enhance the overall thought process, to give them the sense for technological miracles, and how they can be a part of a revolution in making, in today's world, also giving them the platform to augment their Management skills and Cross Functional Team Leadership.

Collaborate with Us

We have collaborations with the Top Design Institutes across the country. To partner with us would provide your institution unmatched, unparalleled Brand empowerment. Not only would your School stand amongst the rest, being unique in providing such Training Programmes to the Students, But also get featured in various e-commerce platforms in distributing automation products and content to the students, also enhancing the entrepreneurial exposure of the students in the same process. We also have various Seminars and Training Schedules in where, IIM/IIT/NIT Graduates would be keynote speakers. This would also enhance campus culture and enlist your school as one of the first in country, to encourage Product Development.

"A Profile at ISTS is a one-step ticket to national consumer viewing"!

We offer Featured Profiles of Collaborating Schools across all our Platforms of Presence.

At ISTS, Our Ultimate Aim is to contribute to the environment and Sustainable Energy through Technical Advancements in Green Energy. We are partnered with several such Energy Firms and Research Institutes, and have a dedicated team of expert Individuals who collaborate with them as Consultants. As our Partner, your brand name would be associated with every of our platform, which would include Featured Column in Website, Brochures, Annual Reports, Seminars across schools around the Country and Many more. At ISTS, We value Trust.

Thank You!
